Education

M.Sc. in Computer Science and Engineering *2025 – Present*
Politecnico di Milano, Milano

Relevant courses: Computing Infrastructures (30L/30) · Embedded Systems (30L/30) · Security and Resilience of Critical Infrastructures (30L/30) · Advanced Operating Systems (28/30) · Advanced Computer Architectures (28/30) · Software Engineering 2 (28/30)

Exchange Semester (incoming) *2026 – 2027*
Chalmers University of Technology, Göteborg, Sweden

Relevant courses: Computational Techniques for Large-Scale Data · Statistical Learning for Big Data · Design of AI Systems

B.Sc. in Computer Science and Engineering (Final grade: 99/110) *2022 – 2025*
Politecnico di Milano, Milano

Relevant courses: Software Engineering project (30/30) · Software Engineering (29/30) · Algorithms and Data Structures (30/30) · Data Bases (30/30)

Experience

Performance Engineer Analyst *Feb 2025 – Sep 2025*
MOVIRI S.p.A., Milano

- Developed and updated over **50 Python integrations** between **Splunk** and **Dynatrace**, reducing API calls by **30%** through logic optimization.
- Used **Selenium** for automation tasks and validation of performance workflows.
- Automated key steps of recurring report-generation workflows, **eliminating the manual work** for those reports.

Voting and active member *Apr 2025 – Present*
Politecnico Open Unix Labs (POuL), Milano

- Held the **Git 101** course (2026 edition) as a speaker for **300+ students**, covering essential concepts.
- Assisting the sysadmin team by learning **Kubernetes** to support the lab's infrastructure management.

Skills

Programming: Python (advanced), C (intermediate), C++, Go, Java, SQL
Automation & DevOps: Docker, Kubernetes (k3s), CI/CD (GitHub Actions), Selenium
Core / Soft Skills: Algorithms & Data Structures, Distributed Systems, Linux
Research Interests: Distributed systems, Databases & data systems, Systems programming, Large-scale data processing
Languages: Italian (Native), English (Advanced – TOEIC 920/990)

Open Source

DuckDB PR
Added the duckdb_secret_type_parameters() system table function, exposing secret-type parameter schemas via SQL (merged).

Dandelion (ETH Zürich EASL) PR
Fixed ELF parser to respect p_align from program headers instead of a hardcoded 4 KB alignment, enabling correct mprotect memory protection on aarch64 systems with non-standard page sizes (merged).

Projects

Tris Inception — Distributed Game Engine — *Go · React · Docker · Kubernetes (k3s) · CI/CD* Demo Repo
Designed and deployed a distributed game engine in Go, exploring stateless backend architecture, container orchestration with self-hosted Kubernetes (k3s), and fully automated GitOps deployment via GitHub Actions. Features Traefik ingress and automated TLS certificate provisioning.

LSM6DSOX — Linux Kernel IIO Driver — *C · Linux Kernel · IIO · Regmap · I2C* Repo
Educational Linux kernel driver for the ST LSM6DSOX 6-axis IMU (accelerometer & gyroscope). Integrated with the Industrial I/O (IIO) subsystem supporting sysfs direct reads, high-speed streaming via triggered kfifo buffers, regmap over I2C, and devm resource management.

Galaxy Trucker — *Java · Java RMI · Socket · Java FX GUI · MVC pattern* Repo
Java client-server implementation of the board game Galaxy Trucker using RMI and sockets, with JavaFX GUI and MVC architecture. Team project focused on networking, concurrency, and software design.

Awards

2022, 2023 — Angelini Industries Merit Award (2x)
Awarded as *Best Performing Student* for two consecutive years.

Certifications

2024 — *TOEIC English Test – Score: 920/990*
2024-01 — *CCNA: Introduction to Networks*
